

Archit Khandelwal

Full Stack Web Developer, ML Engineer

Hi, this is Archit Khandelwal. I'm a Full Stack Web Developer and an ML Engineer. I always want to learn new things and go deep into the technologies, as how much knowledge we take, will always remain less. I always work on my skills and try to make them better. I had made some projects as to get a better understanding of the technologies I am learning or what I had learned. I love to work in a team, as we get a better understanding and some creativeness of the work we are doing.
